Tri-Vortex™

GREEN LASER

**For pain relief &
For drinking water**

**A powerful tool for relief of
pain and to structure drinking
water for best hydration.**

**Enhanced
by Tri-Vortex
Technology™**

What is a Tri-Vortex™ GREEN LASER?

The Tri-Vortex™ GREEN LASER has a special design that allows for continuous use with no overheating. This is important when using it for pain relief or therapy. It has been treated in a unique Tri-Vortex™ chamber for over 24hrs - a totally safe and natural energy field that observes nature's powerful and logical rhythms.

The focused and structured light coming from the GREEN LASER, makes it the premium item in Tri-Vortex product range.

Recommendations for use

The laser can be pointed directly onto the skin in the area of pain - moving it to and fro for up to 2 minutes in one spot. It will also work through light clothing such as shirts. It can safely be used multiple times per day.

Use it for pain relief from arthritis, gout, fibromyalgia, stress, torn muscles, headaches, tennis elbow, tendonitis, back pain, menstrual pain, bruises, carpal tunnel, insect bites and many more.

The GREEN LASER can also be used to structure drinking water and other liquids for best hydration - see website for details and protocol for sufficient water intake. If it is not Tri-Vortex branded, please don't use other lasers as recommended here.

Warning

This is a very powerful laser and should not be pointed into human or animal eyes. Do not stare into the beam and it is recommended to wear protective glasses when using the laser in conjunction with acupuncture or meridian therapies.
