

# Tri-Vortex™

## WATER DISC

## For healthy and good tasting water

Enhance other drinks  
such as juices, wine,  
teas, dairy etc.

### What is a Tri-Vortex™ Water Disc ?

This Tri-Vortex™ stainless steel Water Disc has been treated in a unique Tri-Vortex™ chamber for over 24hrs. The Water Disc gets treated with a totally safe and natural energy field that observes nature's powerful and logical rhythms. The powerful energy fields of the Tri-Vortex™ treated Water Disc create flowing molecular structure in any liquid **within a few minutes**.

### Using the Tri-Vortex™ Water Disc

- **Treat your drinking water** by placing the glass on your Water Disc for approx 3 minutes – or leave the Disc permanently in your water dispenser. The Water Disc will improve taste, smell and texture of wine, juices, dairy and most liquids.
- Tri-Vortex treated water is beneficial to health - increasing the level of hydration at cellular level and the flow of nutrition to cells.
- Place the disc directly **in your bath water and add a pinch of salt** – it makes the water softer and is beneficial for dry and itchy skin conditions.
- The disc can safely be **used for treating of water for pets** and other animals.
- For best results, the disc should be used **in conjunction with proper bodily hydration** – ask your supplier for details on recommended water and salt intake or see [www.trivortex.co.za](http://www.trivortex.co.za)

### The Tri-Vortex™ Taste Test

**Make sure that liquid to be tested is kept at least 4 meters away from the Tri-Vortex™ Disc before testing begins.**

- Pour a ¼ glass of tap water, fruit juice, red wine or coffee.
- Pour a second ¼ glass of tap water, fruit juice, red wine or coffee and place this glass on the Tri-Vortex™ Water Disc for 3 minutes
- Remove Water Disc from the room or take the treated second glass away from the Disc and place next to first untreated glass.
- Smell and taste the differences between the treated and untreated liquid.

**The treated liquid will have a smoother taste and less “after-bite” than the untreated liquid. The changes in smell and taste are an indicator that the Disc is charged and working.**
