Tri-Vortex™ Interview August 2008

The Real Story Behind Tri-Vortex™ & Three Keys to Improve Well-being

AU – Anton Ungerer | JM – John Murphy

Welcome

00:15 JM: Welcome and thank you for taking the time to listen to this important interview. This is John Murphy. I am based in Melbourne, Australia and one of the key people bringing the message of Tri-Vortex Technology to the world. I first discovered Tri-Vortex early in 2006 when my passion for understanding life source energy led me to taking a full six months off to investigate subtle energy technologies. I was so impressed with the outstanding results of Tri-Vortex that I invested time and money to further develop commercial applications of the technology. You are about to hear a discussion with myself and a dear friend of mine and one of the brains behind Tri-Vortex.

Disclaimer

Before moving along, let me make our legal folks happy and say that the following information is for your personal reference only and not to treat, cure, prevent diseases, disorders or conditions. You can see our full legal terms at www.trivortex.com.au

Headline Benefits

In the next hour, you will discover...

- Why you can feel drained even when you think you are doing all the right things
- How you can sleep like a baby every night, be more focused and achieve more
- You will learn about the Triad of Life - water, universal energy and Tri-Vortex and how they work together for your health
- You'll see why keeping your personal energy in balance is so critical for your well-being
- Discover how you can feel happier and in control of your emotions and life
- How you can give your pets a better life and grow some amazing fruit and vegetables
- You can also find out how you can live more harmoniously with your loved ones

So let's get started and introduce you to my business partner in Johannesburg South Africa, my great friend Anton Ungerer. Hello Anton...

Greeting

AU: Morning John and all the listeners, I am always excited to share what I am so passionate about and hopefully I can shed some light on what we call Tri-Vortex technology.

JM: Before we understand your background and where Tri-Vortex came into the picture for you, could you answer a question that is top of mind for listeners... and that is...

'What is Tri-Vortex?'

AU: TV is an advanced sound technology used to treat products made of almost any material (that being SS, wood, leather, plastics, silk, lasers – to name but a few). This treatment process creates a resonance or subtle vibration in the materials which has proven to have many beneficial effects in humans, animals & the environment. From results and experience in many different countries, I can tell the listeners that we have had amazing success in a number of important areas pertaining to the general well-being of people.

JM: And what would you see as the main reasons listeners would use Tri- Vortex?

- AU: 1. Structuring/energizing of drinking water for proper bodily hydration
2. Natural relief from pain with no chemicals
3. A major reduction of the side effects experienced from EMR
4. Balancing of energy and emotions

AU Background

JM: Could you tell us about your background and how you got involved with Tri-Vortex?

AU: Born in SA

Matriculated and did a 2yr stint in the army medical core. Qualified as a medical technologist in the area of clinical pathology. Worked in government and private pathology laboratories Senior management positions at Roche, Bayer, Abbott.

When I left, I started my own business in 1995 – and this was also the beginning of a journey into healing and holistic approaches to life.

Did many different courses and studied various methods of natural healing.

WATER – tower, Katilehong

Research led me to find the inventor of TV – Brian. We bought the rights to become only the 2nd facility in the world ...

In the last 7 years, we have managed to build the biggest treatment facility, my dear friend and genius, Louis, has written software that is truly a divine gift for the development and further research in Tri-Vortex.

I have 2 wonderful daughters and the most gentle and kind wife anyone could wish for. I still do a lot of research and development and to relax , I play golf

Tri-Vortex Background

JM: Could you please give everyone a picture of the humble beginnings of Tri-Vortex technology and the progress made since you got on board?

AU: TV in US since 1989 - SA in 2001 built the first chambers. Quite excited comms backwards and forwards after Brian’s visit in 2004, we were on a fast track of development. Software & new hardware developed in SA - resulting in improvements and much more sophisticated and controlled research.

With my brother Hannes we embarked on a process of building a testing the biggest treatment facility in the world – today we have 4 such chambers in operation – with 6 more in the pipeline.

JM: Core to people’s understanding of how Tri-Vortex works, is the fact that we are energy, and our energy blueprint existed before our physical body. There is an organised field of life - an energy that directs the theatre of life so to speak. This is best viewed in the phantom leaf effect. Where, using Kirlian photography, a leaf displayed an energy field like our aura around the edges of the leaf. When they tore the flesh of the leaf away, the energy field still existed. This is described further in our free email course at www.trivortex.com.au. I’m wondering how our energy body or etheric body is affected by Tri-Vortex - can you explain this?

AU: In its pure form, Energy, like matter, is structured.

In fact, Health is a relative state of structure or vibration in the body. The resonance form our treated products are high vibrational and entice our cells into a more natural rhythm – as inspired by Nature.

This creates a more balanced and coherent energy flow in the body – and off course the results affect all 3 aspects of our being – including the etheric – in a very positive manner.

The Divinely inspired TV process blends the 3 building blocks of matter (namely sound, light & geometry) in a process that is converted into an acoustic signal. This electrical signal is transmitted into special chambers that contain products to be treated.

Use of these products result in improved vitality and wellness

STEP 1: Balance Energy – How – EAV Testing

JM: I expect everyone is waiting for the three key steps to how Tri-Vortex can help to improve well-being. Number one relates to your last comments... the concept of balancing energy?

AU: When you have created coherence or balance in the body’s energetic field (thus a situation which is less chaotic), the body can release certain of the stuck emotions.

As you very well know, blocked energy or emotions almost always lead to conditions that manifest as some sort of dis-ease in the physical body. We have very clearly demonstrated these improved energy flows in meridians - by methods and equipment all over the globe:

Avatar machines

SCIO

Body Sense ...

JM: Measuring acupressure points of the body that relate to organs and systems reveals the immediate effect of Tri-Vortex which balances energy all across the body - depending on the testing machine - a 15-25% immediate improvement.

How does step one help to balance our emotions?

- Website:
www.trivortex.co.za

AU: I have covered some of this in my previous comments, but always remember this comment –“As above, so below”

Meaning that if energy is more balanced, the physical body will also be in a more balanced state – and off course this applies both ways.

JM: We had a client call us recently to order an additional Tri-Vortex pendant. His wife wanted a pendant. She was amazed how Tri-Vortex had made a thorough gentleman out of her husband!

How does balanced energy help to promote greater focus and productivity?

AU: I again refer to the comment of “As above, so Below” High vibrational energy will create improved vitality and well-beingness in all aspects of your life.

Just look at the water crystal photography of Dr Emoto and you will surely understand what is meant by “As above so below”

JM: We can get better quality sleep when Tri-Vortex helps to balance the flow of energy across our body?

AU: Better quality sleep is another positive side effect from using the TV products. When the body is functioning in a more coherent state, one can reach a state of relaxation more easily. However, I always couple this to a suggested hydration protocol from Dr B – taking a small pinch of salt on the tongue with a glass or two of Water before going to sleep – this is especially helpful for sleep disorders in the elderly.

STEP 2: ENERGISE – Hydration - JV partner - Dr. B

JM: Step two on improving wellness reveals a very interesting impact of Tri-Vortex on water and hydration Anton.

AU: One of the first things I always do in workshops, is to share the importance of proper bodily Hydration.

I use a combination of various works by Dr B, Dr Emoto and others to drive home the message of how vital it is to hydrate our bodies correctly – after all, hydration is the foundation to all good health.

It is only then that I start talking about the quantity and QUALITY of water one should be consuming. As far as quality of water – we have no more excuses to justify drinking plain tap water or even plain filtered water – this has very little benefit to the body – and I dare say – it is detrimental to your health Properly Structured or energised water also has a wider role to play in the body – it supports the heart in its efforts to produce the energy needed by the vital organs.

Having energised/structured water has a direct benefit which is an improved immune system - need I say more .

TV is a tool that is really exciting in that we can now offer people some real answers and solutions to proper hydration. Many people talk about hydration, but don't put the puzzle together in a more complete down to earth application – by this I mean that some will talk quantity and others will talk quality – hardly ever do you find them putting it all together - responsibly and simply.

JM: ...hydration program at www.trivortex.com.au/water This document also shows a suggested water intake regime. Over the last 12 months we have been working with Dr. Emoto and water crystal photography. Do you want to explain how Tri-Vortex energises and re-structures water Anton.

Energised, Structured Water - - JV partner - Dr. E

AU: The resonance of the products instills a natural order or balance at molecular level. This vibrational coherence obviously has a beneficial effect – as so clearly shown by the photographs that you had done in Dr E-Moto's laboratory

JM: So since everything, including us contains water, how do we use Tri-Vortex in our diet?

AU: Place you drinks and food on the discs – this results in an state of hydration and a better assimilation of nutrients and minerals. Shelf life of food is improved as a result of standing on a TV plate for eg

www.trivortex.co.za

STEP 3: PROTECTION: Cell phones - Cordless phones - Electrical appliances - Phone towers - Electricity - Satellite transmissions

JM: And step three is a way of protecting ourselves from the ever-increasing sea of invasive energies that throw out our energetic balance. Can you tell us more Anton?

AU: In this modern world, Technology is not only crucial to cope with the fast pace, but we are certainly affected by the transmissions and radiation from all these gadgets & transmitters. Any kinesiologist or body energy testing equipment will testify to this fact.

For anyone to claim that they can stop radiation from devices is incorrect. So too, TV products don't stop radiation. In fact, we make very sure to inform the listeners and the public of this. With TV, the negative effects on the body are largely reduced. The very best remedy to EMR from devices is to have limited use or exposure to them. This is often not practical.

TV offers a degree of comfort / restoration from these effects of EMR – by largely reversing the ill effects at cellular level.

JM: Certainly minimises brain and energy drain when you have clean energy around you. So putting all of the three steps together creates the harmonious lifestyle that we referred to the start of this discussion?

AU: Yes... in summary the steps are

1. **Balance** energy and emotions by wearing a Tri-Vortex pendant or disc
2. **Energise** your food and drinks using Tri-Vortex discs or plates
3. **Protect** yourself and family by placing Tri-Vortex tags on phones, plugging electrical appliances into Tri-Vortex power adaptors. Better still use Tri-Vortex circuit breakers to protect the whole home.

JM: A lot of our clients are health practitioners – naturopaths, kinesiologists, holistic doctors, acupuncturists, chiropractors, masseurs, etc.. What are the key applications for health practitioners?

AU: TV products are used as complimentary /supplementary to all hydration advice. Having your energy balanced makes for a quicker and a more successful recovery from illness – and so certainly TV products have a major role to play in this arena.

JM: A common question is: What is the difference between Tri-Vortex and other subtle energy products. How would you answer this?

AU: Diff technologies make use of different frequencies – some of doubtful origin and effect. We don't have all the answers, but what I can say, is that we use a more complete approach to frequency – a multidimensional VS a single dimensional application : Freq, phase, amplitude, shape, duration and so forth...

The application of platonic geometry is certainly an exciting and effective approach. This more closely mimics the rhythms of nature and is the key to TV research and development.

JM: Another common question: What's the difference with all the products?

AU: All the products are treated the same, it is only the application of these products that dictated shape and materials to be used.

JM: Is Tri-Vortex magnetic?

AU: NO magnetism is involved in the treatment process of TV technology

JM: Is Tri-Vortex safe?

AU: Yes, TV is totally safe .

We have approx 20 yrs of experience As with any recovery or healing process, the body can undergo slight degrees of detoxification, but his is perfectly normal.

JM: OK Anton, I think everyone will be keen to get started on the three-step energy booster program. I want to thank you for making the last hour a very interesting and enlightening. I just have a few items to cover off for listeners so we'll goodbye to you Anton - thanks again.

AU: In closing and in reflection of this miracle called TV technology, I would like to express my deepest gratitude and love for those people that have been so perfectly placed on my path : My family Louis the gifted programmer All those that have supported us and used our products YOU, John in Australia

END INTERVIEW

JM: If you are already a Tri-Vortex client – congratulations and we hope you are enjoying the feeling of taking your health and well-being into your own hands.

If you are considering Tri-Vortex and want more balance, energy and protection then let me tell you briefly how you can get started today without any risk to you...

RFT Guarantee

JM: A sincere thank you for listening in on the discussion today and for being proactive about your health and well-being.
